So you work in a job which:

- Its **half-time** (half-life) is **6 months**, &
- Its **doubling-time** is **20 month**
- You works in a **ever-changing & ever-growing** profession !
- So you should **keep updating** !

E-Journals

مجلات الکترونیک در واقع نسخه الکترونیک همان مجلات چاپی هستند که بر روی وب سایت ناشر و یا مجله قرار گرفته‌اند و یا اساسا مجلاتی هستند که از ابتدا بدون آنکه نسخه چاپی داشته باشند به صورت الکترونیک منتشر شده‌اند.

E-Journals Benefits

- 1- دسترسی به نسخه الکترونیک مقالات بلافاصله پس از نهایی شدن مقالات مجله و حتی قبل از چاپ نسخه چاپی آن.
- 2- دسترسی به مجلات الکترونیکی بدون محدودیت زمانی و مکانی.
- 3- جستجو در نسخ الکترونیک یک یا چند مجله به طور همزمان.
- 4- ارسال نسخه الکترونیک برای دیگران به راحتی از طریق پست الکترونیک.
- 5- آرشیو و نگهداری آسان.
- 6- دسترسی به آرشیو الکترونیکی سال‌های قبل.
- 7- استفاده از سرویس‌های جنبی مانند Alert.

انواع مجلات الکترونیک بر حسب هزینه

1- مجلات الکترونیکی رایگان

www.freemedicaljournals.com

2- مجلات الکترونیکی هزینه‌دار

مجلات الکترونیک بر حسب سطوح دسترسی

1-Table of Content (TOC)

2-Table of Content + Abstracts

3-TOC + Abstracts + Full texts

انواع Full Texts

PDF Fulltext

(Portable Document Format)

در واقع نسخه تصویری تهیه شده از مقاله است که عینا همان مقاله و به همان صورت چاپ شده در مجله است.

HTML Fulltext

(Hypertext Markup Language)

نسخه متنی مقاله و به صورت Text می باشد.

Electronic Journals & Collection

- Elsevier Science
- Ovid (LWW)
- Wiley Blackwell
- Springer
- Oxford University Press
- Proquest
- Ebsco

Elsevier Science Direct

- ScienceDirect covers about 24.4% of the world's full-text scientific, technical and medical (STM) information across 24 fields of science.

Intersting to know that ...

- Elsevier stablished 1620 !
- ScienceDirect contains over 9 Million peer reviewed article
- 36 full text downloads every second during an average working day.

THE LANCET

these are necessary, and we content ourselves by merely showing in what direction their energy will be most active: To the Medical and Surgical Practitioners of this city, whose assiduous pursuit their personal attendance at the Hospitals—To Country Practitioners, whose remoteness from the head quarters, as it were, of scientific knowledge, leaves them almost without the means of ascertaining its progress—To the numerous classes of Students, whether here or in distant universities—To Colonial Practitioners—And, finally, to every individual in these realms. Consequently, we shall exclude from our pages the unscientific phraseology of the Schools, and adopt as its substitute, plain English diction. In this attempt, we are well aware that we shall be assailed by such unseasonable opposition. But, notwithstanding this, we will fearlessly discharge our duty. We hope the merit of "Medical Debates" has passed, and that mystery and concealment will no longer be encouraged. Indeed, we trust that mystery and ignorance will shortly be considered synonymous. Crises, and signs, have now lost their charms; Nervousness, and gilded symptoms, their power to deceive. But for these, it would have been impossible to imagine how it has happened that medical and anatomical knowledge of all others the most calculated to benefit Man, should have been by him the most neglected. He studies with the greatest attention and anxiety the constitutions of his horses and his dogs, and learns all their peculiarities; whilst of the nature of his own sufferings. Yet, a little reflection and application would enable him to wren from himself and family half the constitutional disorders that afflict society; and in addition to these advantages, his acquirements in Medical learning would furnish him with a test by which he could detect and expose the impostures of ignorant practitioners.

In conclusion—we respectfully observe, that our Columns will not be restricted to Medical intelligence, but on the contrary, we shall be indebted in our exertions to render "The Lancet" a complete Chronicle of current Literature.

SURGICAL LECTURES.

Theatre, St. Thomas's Hospital,
WEDNESDAY EVENING,
OCT. 5, 1823.

At half-past Seven this Theatre was crowded in every part, by upwards of four hundred Students, of the most respectable description; in fact we never before witnessed so great a Surgical class: the night was most pleasing for they all appeared generous men of cultivated manners and good education.

About Eight o'clock, the ANATOMICAL COURSE arrived, and was received with the most enthusiastic applause, when it had ceased, this distinguished Professor commenced his discourse by observing,—That, while it is the province of the Physician to attend to internal diseases, it is the duty of the Surgeon to attend to those that are external; to perform operations for the removal of diseased parts; and to know how to regulate the system by the use of medicine, when local diseases are produced by constitutional derangement. Surgery is usually divided into the Principles and Practice. The first are learned

from observations on the living when diseased, by dissection of the dead, and by experiments made on living animals. Our deductions from these sources, furnish us with the means of knowing a malady by its symptoms, the alteration of structure in a part when diseased, and the various ways in which Nature attempts the reparative process both in external and internal parts. A man who has seen much of morbid appearances possesses great advantages; but his knowledge can be perfect unless he has first fully seen the subject under discussion, in which he must himself have assisted. In the surgical sciences hypothesis should be entirely discarded. And sound theory, derived from actual observations and experience, alone encouraged. The first is an ignis fatuus that is sure to mislead; the last a polar star, a never-failing guide. Experiments on living animals have been found of the greatest utility in directing us to a knowledge of the means by which Nature acts in the reparation of injuries, and in the restoration of lost parts. Thus the method she would adopt in uniting a fracture in the bone of a dog, will show you the manner in which union would happen in the fracture of a
